

# Tata-Boeing to make aero-structures for 737 aircraft

**Bengaluru,** Tata Boeing Aerospace Ltd. would make vertical fin structures for the global aerospace major's 737 family of aircraft, an official of the joint venture (JV) said on Friday.

"A new production line has been set up at our Hyderabad facility to make vertical fin structures for Boeing-737 jets," said the JV in a statement on the margins of the 13th biennial Aero India 2021 at Yelahanka air base on the city's northern outskirts.

The JV's facility has been producing aero-structures for Boeing's AH-64 Apache helicopter, including fuselages, secondary structures and vertical spar

boxes for customers, worldwide.

"The JV is a part of our commitment to co-develop integrated systems in aerospace and defence in India for the world and a reflection of the country's Amnabar Bharat initiative," said Boeing India president Sail Gupte on the occasion.

Tata Advanced Systems Ltd. chief executive Sekaran Singh said expansion of the JV's aero-structures production facility to make vertical fins for 737s was another milestone in its collaboration with the US-based Boeing.

"The new production line is a testament for our commitment to make India

self-reliant in defence manufacturing," said Singh in the statement. As the vertical fin is a structural part, the new production line will use robotics and automation in manufacturing. "The expansion will create additional job opportunities and enable skill development," added the statement. A subsidiary of Tata Sons, Tata Advanced Systems is the strategic aerospace and defence arm of the salt-to-software Tata group. The subsidiary is a key player in making missile systems, radars, command and control systems, aerospace and aero-structures, drones, optronic systems and homeland security solutions.

# Snapchat hits 265M daily active users, India growth market

**New Delhi,** Despite the cut-throat competition coming from the Facebook family of apps, Snapchat has added 16 million daily active users in the fourth quarter of 2020 to reach 265 million users — up 22 per cent year-over-year — and India has once again proved to be its high-growth market. OnePlus India created Lenses for Diwali as a means to bring people together safely during a pandemic.

"Their Lenses garnered over 80 million impressions and reached over 14 million Snapchatters in India. Overall, the campaign was highly successful and drove a 9 point lift in both ad awareness and a 7 point lift in message awareness," said Snap CEO Spiegel.

Snapchat Camera is helping create an average of over 5 billion Snaps every single day.

The Snapchat generation, primarily Gen Z and millennials, are 150 per

cent more likely to communicate with pictures than words and 82 per cent of them believe they have a personal responsibility to change the world," Spiegel said on a call with investors late on Thursday.

Spiegel said that the company has evolved Stories over time to embrace new formats like Shows with total time spent watching Shows increasing nearly 70 per cent year-over-year in 2020.

"Each month, over 250 million Snapchatters open our Map where they can find the people and places that mean the most to them. There are now more than 35 million businesses on the Map for our community to discover, and connecting local businesses," he informed.

Today, more than 200 million people engage with AR on Snapchat every day on average.

Looking forward, "we plan to accelerate our full-year revenue growth beyond the 46 per cent year-

over-year growth achieved in 2020, and grow our community around the world by improving and localizing the Snapchat product experience". Snap reported revenue of \$2.5 billion for 2020, growing 46 per cent year-over-year. "In Q4 2020, we generated revenue of \$911 million, a significant acceleration of 18 percentage points to 62 per cent year-over-year growth," the company said. Snap said that the reach among 13 to 34-year-olds in many of its established markets continues to grow.

# India to emerge as most resilient economy after Germany in 2021: PHDCCI

**New Delhi:** India will emerge as the most resilient economy after Germany in 2021 exhibiting a strong economic resurgence to the global economic turmoil caused by the Covid-19 pandemic, according to a report.

Germany ranks first in the PHDCCI International Economic Resilience (IER) Rank followed by India and South Korea at second and third positions, respectively, according to the report released by industry body PHDCCI.

It is based on analysis of five lead macroeconomic indicators reflecting a country's economic performance including real GDP growth rate, merchandise export growth rate, current account balance as percentage of GDP, general government net lending/borrowing as percentage of GDP and gross debt-to-GDP ratio. India's IER Rank stands at second among the top-10 leading economies, indicating strong resilience of the Indian economy to the daunting pandemic of Covid-19, said PHD Chamber of Commerce and Industry President Sanjay Aggarwal.

# Now control Zoom meeting rooms from your smartphone

**New Delhi,** Zoom users can now control their meeting room experienced from their mobile devices, eliminating the need for users to touch the shared in-room controller.

The video chat app has announced the general availability of new Zoom Rooms innovations that will help organisations safely re-enter the office and sustain an everywhere workforce.

"Pair your iOS or Android mobile client to a Zoom Room, easily join meetings on the Zoom Rooms directly from your client and your mobile client is automatically placed

in companion mode during the meeting," the company said in an update late on Wednesday.

With the Zoom Rooms Controller app on your mobile, you'll have access to additional room controls, including the ability to start or join a meeting and full audio, video, and participant controls.

With supported cameras, Zoom users can see how many people are in a room in real time on the Dashboard and on the Scheduling Display, to ensure social distancing mandates are met and meeting spaces aren't overcrowded.

"As the world plans to safely reopen businesses, educational institutions, healthcare facilities, and government entities, we are focused on innovating across our platform to support their needs," said Oded Gal, Chief Product Officer of Zoom.

Zoom users can also monitor a room's environ-

ment and air quality. "Neat Bar," a Zoom Rooms Appliance, includes an advanced set of capabilities called "Neat Sense," which lets you monitor your meeting rooms for things like air quality, humidity, carbon dioxide, and volatile organic compounds to keep occupants safe and healthy. People can now send a Zoom Rooms for Touch whiteboard to Zoom Chat or email. "If it's a personal Zoom Room, you can also send it to your chat groups. This helps streamline content sharing outside the meeting room, greatly improving cohesiveness in the new hybrid workforce," the company said.
